(57) ABSTRACT

By using an additive for culturing animal cells that contains an amino acid or glucose, or an amino acid and glucose; or a medium for culturing animal cells that contains an amino acid or glucose, or an amino acid and glucose in addition to a medium component; or a method for culturing animal cells that includes culturing the animal cells using the aforementioned medium, or adding the aforementioned additive to a culture, the proliferation ability of animal cells can be improved particularly when the animal cells are cultured using a serum-free medium or a low albumin medium.

number of viable cells (day 6)
